Nomenclature

KTH: Kungliga tekniska högskolan (The Royal Institute of Technology)

THS: Tekniska högskolans studentkår (KTH student union)

Dr: Doktorandsektion

CFU: Chef för utbildninginflytande (Head of educational affairs)

KS: Kårstyrelsen (The union board)

KF: Kårfullmäktige (The union council or the general assembly)

FR: Fakultetsrådet (The faculty council)

US: Universitetstyrelsen (The university board)

PAD: Program ansvarig doktorand (PhD student representative for the program)

DrInK: Doktorand Integrerade Klubbmästeriet (Master of ceremonies group)

SFS: Sveriges förenade studentkårer (The Swedish National Union of Students)

SSCO: Stockholms studentkårer centralorganisation (Stockholm's student unions central organisation)

Background

The objectives of the PhD Chapter are to promote more effective and higher quality PhD education and research, promote a stimulating working environment and improve the general conditions for its members. The PhD Chapter should also work towards a greater unity and fellowship among its members.

The purpose of the operational plan is to guide the executive work of the board of directors throughout the operational year 2019/2020. The operational plan has been prepared using the input of previous board and refined during the introduction day for operational year 2019/2020 held on the 14th of August 2019. All elected board members *Emma Riese*, *Tage Mobammadat*, *Rinat Yapparov*, *Alessandro Enrico* and *Kasra Khatami Mashbadi* participated in the development of the operational plan. In addition, *Ksenia Loskutova*, PhD Chapter representative in the union council/Kårfullmäktige (KF) also participated.

Focus Areas during 2019/2020

Visibility and social events

Last year 2018/2019, the PhD Chapter focused on visibility and organized lots of events, such as board game nights, writing workshops and quiz nights. The PhD Chapter also sent out newsletters through emails and used Facebook and Instagram to advertise events. However, the PhD Chapter work that was not social was not as clearly communicated and visible aside from the website. This year's focus is to improve the visibility of chapter work.

Creating a stronger community

Not all PhD students have lots of colleagues in their research field, and being a PhD student could be experienced as lonely for some. The PhD Chapter should aim to tie together all PhD students and create a friendly environment for all PhD students.

Welcoming new PhD students

As part of the chapters responsibility towards new members, the PhD Chapter should work to welcome new doctoral students through participating in reception ceremonies and sending a welcoming letter to all newly admitted PhD students.

Birthday Party

The PhD Chapter is turning 40 years the 24th of March and this will have to be acknowledged. Our idea is to arrange some sort of Birthday celebration and invite members of the PhD Chapter as well as members from other chapters and PhD students from other Universities. This event could also improve the visibility of the Chapter.

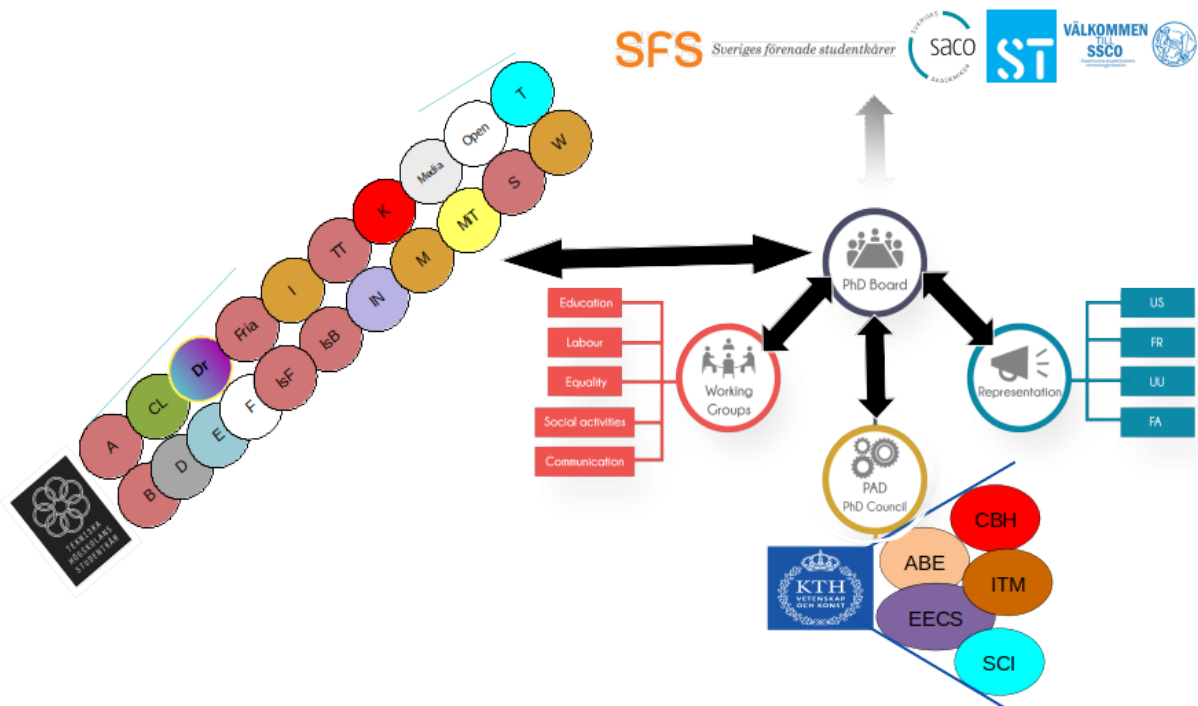

Collaborations

The PhD Chapter share the Chapter hall together with the **Aerospace Chapter**, and therefore should have good collaboration with the Aerospace Chapter on all matters concerning the Chapter hall (such as pubs and events).

Educational Advocacy

Doctoral students influence on every level

The PhD Chapter is part of the student union at KTH (THS - Tekniska högskolans studentkår). THS is responsible for student influence at all levels of education, including third-cycle education. Since the PhD Chapter is the only chapter at the student union that exclusively organizes and represents PhD students, the chapter should work with THS such that doctoral influence is working in a bottom-up approach at all levels and forums affecting research and research education. The PhD Chapter should also work together with THS central, KTH Doctoral councils and **PhD Advisor**, to lift up issues in a more effective way.

Sustainable engagement

One of the challenges for the PhD Chapter is to ensure a **sustainable engagement**. We need to make sure that it is possible to be engaged in the PhD Chapter in a sustainable way by ensuring that all representatives, no matter on which level are getting **sufficient time compensation**. This is a crucial part in making sure that our representatives are not forced to work overtime due to their representation role. Being a representative should not add any additional psychological or study burdens and be grounds for a prolongation.

Communication and transparency

All representatives have a responsibility towards the doctoral students at KTH they represent at large to be transparent about their work. In order for the student influence to be truly working, **communication** between the local levels, from each PAD (program responsible representative, programansvarig doktorand), to the school councils (doktorandråd) to the central level the PhD Chapter is necessary. All representatives should also be confident about what their role entails and who to contact if they need advice or assistance. The PhD Chapter should be informed and approve all appointments for all local and central representation and also offer support for representatives. For central representation, the PhD Chapter should have a possibility to appoint representatives and keep THS informed about appointed representatives.

Synchronisation with school councils and PADs

In 2018/19, the chapter enacted new board member definition in which one of the board members has the role **Council coordinator**. This is one step towards getting the communication between the local and central level to work more smoothly. During 2019/2020 the PhD Chapter board shall plan to specifically invite school councils chairs to take part in board meetings and chapter meetings. We also plan to work together with THS central to unify how PADs are appointed and develop a work description for a PAD.

External Collaboration

During 2018/2019 the PhD Chapter started a collaboration with PhD organizations from Karolinska Institutet (KI) and Stockholm University (SU). A network that met and discuss questions and exchange experiences regarding doctoral issues. The PhD chapter should continue to collaborate with doctoral organisations in Stockholm and Sweden to exchange best practices and strengthen the collective voice of doctoral students in Sweden.

Survey to identify issues

During 2018/2019, the previous board started to develop a survey to be sent out to all PhD students at KTH, with questions regarding PhD life, such as supervision, Individual study plans (ISPs), balance between work and private life and distribution between thesis work and course work. This was done with the objective of identifying common issues and getting the general opinion from the PhD students. Distributing a survey with the PhD Chapter as the sender would also be one way to improve visibility for the chapter, as well as getting input from the Chapter members on the work of the Chapter. This survey was however not distributed during 2018/2019 and the current board will work towards distributing it during 2019/2020.

PhD students' environment

The PhD student ladder, is currently based solely on research progression, not on time spent. The requirements for moving up the salary ladder could also differ between different research fields and education programs. For instance, to move to the 50% step, some require PhD students to have a seminar with an internal or external opponent, and some require the PhD student to write and defend a Licentiate thesis. The PhD Chapter should advocate to have a consistent progression criteria preferably based on time that also incentivise accomplishments.
