

Doctoral Representatives at KTH-HT2020

Reported hours HT2020

To: KTH administrations at KTH boards, councils, committees and groups; KTH doctoral education quality responsables; KTH head of schools;	 <p><i>PhD Chapter at KTH</i> <i>Doctoral students' network</i></p> <p>Doktorandsektionen vid Tekniska Högskolans Studentkår</p>
Attention to: KTH rector; KTH vice rectors; KTH dean of faculty; KTH vice dean of faculty; KTH doctoral program directors; KTH vice head of schools and docentship committees; KTH head of departments;	Copy to: KTH head of administrations; KTH head of finance; THS/PhD school councils; THS/PhD chapter board; THS/PhD auditors; THS head of educational affairs; THS board;
Date of Issuance/revision: 2020-06-25/2020-09-30/2020-10-05/2021-01-28	PM Type: Decision
Effective Date: 2020-07-01	Responsible: PhD Chapter Board, e-mail: board@dr.kth.se
Period: 2020-07-01 to 2020-12-31†	Diary number: Dr2021-CP-04/RHT1

Decisions

To₁ endorse KTH-central doctoral representatives as detailed in this PM's [attachment 1](#), as per Dnr-2016-0451, reported in a separate decision [Dr-2020-CP-02/001](#).

To₂ endorse school-level doctoral representatives as detailed in this PM's [attachments 2, 3, 4, 5](#) and [6](#) respectively. **To₃** notify respective officials that the representational tasks correspond to time compensation prognosis detailed herewith which shall be the primary ground for time compensation.

To₄ request the head of KTH schools or KTH doctoral education responsables, if such delegation exists, with ensuring the funding of corresponding representational activities, if no established framework exists.

*: subject to updates.

Postal address: Drottning Kristinas väg 15 – 10044 Stockholm

To, request doctoral education support, HR units, and financing units, with formalities associated with the representational workload reported herewith, including: reduced study activity in LADOK & financing support for corresponding activity remitted to the financing of doctoral studies.

Background

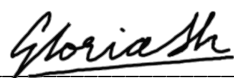

The provisions of regulations concerning student influence outlined in kap. 4-4 a §§, 2 kap. 4 & 7 §§ högskolelagen (1992:1434); 2 kap. 14 § & 10 kap. 4 § högskoleförordningen (1993:100), and KTH guidelines concerning student influence V-2019-0210 & V-2019-0605, lay the grounds of rights for students to exercise influence by typically three representatives when matters and decisions affect the conditions of studies. There is a special nature of doctoral education being the only education that reflects an entire third-cycle and typically encompasses the other two cycles to a limited extent, in addition to particularity of reliance on thesis work and being affected heavily by KTH research. Moreover, some matters and decisions at KTH can affect mostly the conditions of third cycle studies and research, decisions & discussions taken at executive and strategic groups at the school and departments, docanship committees, and research.

The PhD chapter at KTH (Doktorandsektionen vid THS, Dr/THS), is the exclusive official representative and working body for doctoral students issues within THS which has a student union status at KTH. The PhD chapter henceforth embodies THS mission and framework to develop the quality of doctoral education and research at KTH through doctoral students representation at all levels. With reference to the aforementioned, the PhD chapter prepared this decision to provide the acknowledge list of doctoral representatives and time resources needed to do the representation in an effective and sustainable manner. This PM also follows directives of the plan of operation, Dnr. Dr2019-PB-02/0001, enacted for 2019/20, where the chapter board shall work towards strengthening doctoral influence, sustainable engagement and improving procedural routines regarding representation and communication at all levels.

The positions of trust listed herewith include various KTH boards, councils, committees, groups, workgroups at KTH central-, school- and department- levels. The decisions referenced PhD chapter decisions regarding representatives as in 2018-12-10, 2019-02-09, 2019-06-03, 20190814, in addition to KTH schools' and PhD councils' recommendations.

In light of rector's decision Dnr. V-2016-0451 and legacy decision Dnr. V-930-2005-0345 concerning time compensation framework for doctoral representatives; the PhD chapter invoked established internal guidelines since 2018-02-28 most recently revised on 2019-08-29 and documented in the chapter's working directives [Dr2019-PB-01/0004 §24.7](#) in addition to the version attached herewith in [attachment 7](#), to provide an objective ground motivating the time compensation budgets. The time compensation framework is a crucial component for the sustainability, healthy, high-quality engagement of doctoral representatives and allows such engagement to be done effectively without risking adverse psychological stress ensued by their engagement. Due to outdated time compensation policies for school-level representatives, the PhD chapter made this initiative to include a decision on representatives and requests within aforementioned established grounds, time compensation for local representatives as an upper bound for their engagement. A proposal of the prognosis was circulated to the PhD councils and was enacted with feedback received. This is the updated version where the percentage for time-compensation has been updated to the hours spent, which in some cases differ from the prognosis [Dr2020-CP-04/HT01](#).

On behalf of the PhD chapter,

Gloria Samosir
Chairperson 2020/2021
Stockholm, 2021-02-02

Federico Izzo
Vice Chairperson 2021

NOTES

1. ABE PhD council has been able to appoint further provisional representatives at the program level or the department level during the semester.
2. Dr/THS has established representatives based on ABE PhD council appointment, ABE school recommendation or applicable THS central frameworks.
3. Time compensation percentages are based on workload for each PhD student representative and their individual work tasks, including time spent for preparation and administration tasks for each position. This is the reported hours and replaces the prognosis in [Dr2020-CP-04/0001](#). The stated percentage should be basis for a prolongation with a special reason due to serving in a commission-of-trust post during VT20.

NOTES

1. ITM PhD council has been able to appoint further provisional representatives at the program level or the department level during the semester.
2. Dr/THS has established representatives based on ITM PhD council appointment, ITM school recommendation or applicable THS central frameworks.
3. Time compensation percentages are based on workload for each PhD student representative and their individual work tasks, including time spent for preparation and administration tasks for each position. This is the reported hours and replaces the prognosis in [Dr2020-CP-04/0001](#). The stated percentage should be basis for a prolongation with a special reason due to serving in a commission-of-trust post during VT20.

Attachment 7: Time compensation

Guide on time compensation for PhD students at KTH (Dr2019-PB-03/0004)

BACKGROUND

Time compensation for commission-of-trust positions for PhD students officially appointed by KTH student union at the central and national level is subject to rector's decision Dnr. V-2016-0451 in effect since the 1st of July 2017. As per PhD chapter board protocol on September 19, 2017, a work-group, had been created to investigate and propose how time-compensation can be managed with the aim to provide guidelines for the board members. On the 28th of February 2018, the board decided to adopt a procedure on how to work with time compensation. This document details this procedure in effect. Due to absence of school level policies, similar compensation policy has been adopted for school level representatives.

GUIDING PRINCIPLES

- 1- Transparency: representational work to be compensated needs to be communicated. This in practice means that individual work (to be done, or already done) needs to be communicated with the board and be verifiable by means of supporting documents such as meeting minutes.
- 2- Sustainable representation: representational work to be compensated shall take into account preparation work, documentation and handover. This in practice means reading up on relevant policy documents, reporting highlight work to relevant representatives in the different levels, updating relevant testaments and participating in handover.
- 3- Representational effectiveness: a base time shall be allocated for educational purposes about the post and should be allocated for trying out ideas and exploring possibilities without being accounted for. This in practice means the allocation of time equivalent to approximately 3 ECTS per academic year as a fixed rate (~5% in percentage).
- 4- Inclusiveness: representational work to be done or already done needs to consider members who serve national wide representation in connection with representational duties at KTH, this includes the union of students union (SFS), Eurodoc, European Student Union (ESU)⁹.
- 5- Experience-based time factor for prognosis: this implies that for budgeting purposes, time prognosis shall be made based on input of past members. This is to reduce bias when budgeting.

Based on the above, the following is proposed:

- i. Members of intensive working bodies with more strategic duties tied to them, e.g. chapter board at KTH central or other representatives at national and european level should be allocated 5% per their involvement for one term. This also includes chairpersons of school councils. Regardless of the member's extent of involvement, this fixed rate of unaccounted time can be granted.
- ii. Representation work should be compensated as incurred.
- iii. To assist scheduling and planning for engaged members, an initial estimated workload duties can be obtained as follows: $\text{Estimated workload duties (/term, \%)} = 5\% + \text{Sum}(\text{workload multipliers} \times \text{meetings in hours}) / 8.5^{10}$ The numbers to be actually claimed by each member shall be compensated as incurred, i.e. could be different from the estimated numbers. Additionally, national representations and european-level representations are included.

⁹

¹⁰

*: subject to updates.

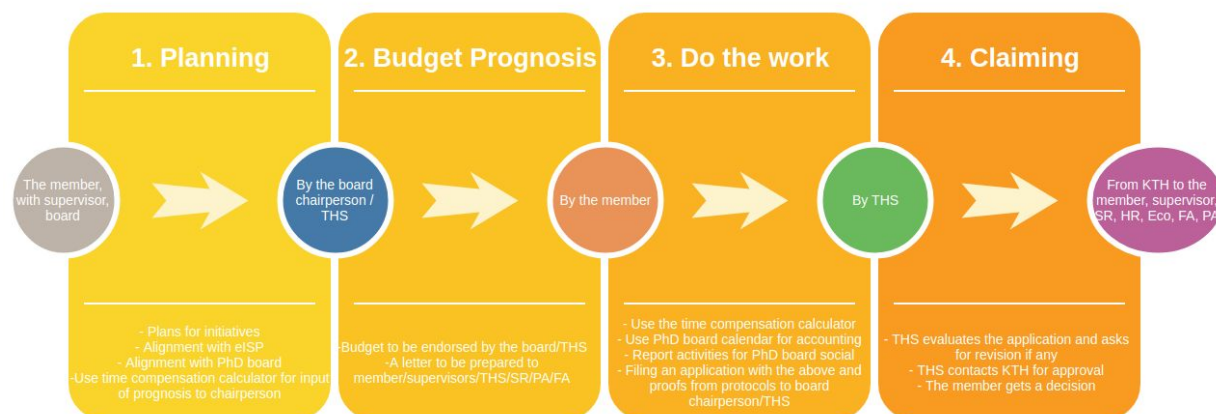

The workload multipliers can be described as follows:

Meeting Type**	workload multiplier (xNumber of hours)
US/LG	3-5*
FR/SR	2.5-4*
FF (AN/BN/RN/Docent)	2-4
UU/UN/UA/FA/KR/RU	2-4*
Språk/Stipen/Sustainability/JML	2-4*
Board/Chapter/Council meetings	2-3*
Other representations	2-5*

*: depending on whether the participant made some extra efforts such as raising issues that require extra time.

** : see the overview of vacancies for the meeting type.

PROCESS

1.a. Planning: starting with the board member planning whereby the member, within the capacity of her/his involvement would self-describe what activities he/she would like to take part in. At this stage, the member can make use of time compensation calculator spreadsheet in the 'summary tab' ([Time compensation log,calculator -Individuals,Doktorandsektionen.xlsx](#)). The stage ends by submitting an application for 'Prognosis of workload within commission of trust to the chapter board chairperson or to THS educational affair representative in case the member is the board chairperson or whomever is delegated with this task.

1.b. Budget prognosis: the board chairperson/THS, or whomever is delegated with this task, takes responsibility of endorsing the application and sending a letter to the member's respective supervisor SR/FA/PA and CC: member/THS. Application template concerning [Prognosis of workload within commission of trust -Individuals.dotx](#). At this point, if not done yet, the board member can already report the prognosis in the eISP, under section 3.4. "Past and planned leaves/appointments eligible for extensions", with reason being "commission of trust".

1.c. Doing the work: here the member is responsible to use the PhD chapter board group to register for activities in its calendar and sub-pages. Reporting is part of compensated time and would enable quality improvement, transparency and accountability. During this

Doktorandsektionen vid Tekniska Högskolans Studentkår

Organisation number: 802412-5026, Website: www.dr.kth.se, E-mail: contact@dr.kth.se

Postal address: Drottning Kristinas väg 15 – 10044 Stockholm

period, the activities can be recorded in the time compensation calculator in the corresponding tabs. This stage ends by filing an application for time compensation to the chapter board chairperson/THS for approval. The document Application for time compensation is attached: [Application for time compensation -Individuals.dotx](#).

1.d. Claiming: This is done by THS where it takes responsibility for approving the claims and making sure it is within the total possible claimable budget. Then, the member would file the application to KTH HR where successful compensation claims will result in issuance of letters to the member and respective supervisors, SR, FA,PA, economy, HR, THS. At this point, once applicable, the board member can commit the actual "commission of trust" in the eISP, under section 3.4. "Past and planned leaves/appointments eligible for extensions". The member takes responsibility for applying for extension at the respective department citing KTH policies and agreed time. The local HR can always get in contact with central HR for any further information/details necessary.

2. For budgeting, time compensation factors used for prognosis are to be used from experience of previous representatives within THS. This is to avoid making the factors purely subjective, speculative and biased.

3. Actual time to be compensated for activities, beyond the fixed proportion, is to be based on 'as incurred'. Proofs by means such as certificates and minutes would be needed. As long as it is not 20% beyond the experience of previous representatives it might not be subject for revision.
