<sup>1</sup> The prognosis will be adjusted and claimed by the end of the semester.

## Background

This time compensation prognosis is in line with the “Guide on Time Compensation” decided in February 2018 by the PhD Chapter Board that can be found in Annex 1 of the decision [Dr2019-CP-02/0002](#) and subsequent others taken related to that matter, and also currently executed by request of THS and KTH.

The prognosis for the central and national level compensation, with a claiming plan, was previously discussed by the Chapter Board at the board meeting on 2024-02-01. The budget for school-level representation is governed by its own guidelines, where each Doctoral School Council took it as a foundation to report their own prognosis.

This prognosis is not final and will be adjusted and then claimed at the end of the semester, and this fact should be taken into account when using any data from it. The adjustment process can be either an increase or a decrease in the percentage time. In some cases, the time is subject to an increase when there is more ongoing work than initially foreseen, and a reduction can occur due to a notable absence from the Chapter or Council activities.

*On behalf of the PhD Chapter Board,*

**Daniel Araújo de Medeiros and Hemanth Venkatesan**

Chairperson 2023/2024 and Treasurer 2024

<sup>5</sup> The increase in the time compensation for individual board members in comparison to the previous year is because of the reduction in the size of the board this year (from 10 members last year to 5 members this year) and the increase of associated workload. All the above-mentioned board members will also serve as Event Managers for the CBH PhD council. The Chairperson gets 15% time compensation owing to the amount of time dedicated to the planning and organisation of all meetings, documentation and participation in other council meetings such as quality council, school council, program council, department council, THS meetings and other duties.
