

Report from SCI PhD council

CM#1
2025-03-26

- We held a welcome event on 18th Feb to introduce our new council to the PhDs.
- We are conducting a Lasertag event on 28th March. So far 40 participants have signed up!
- We were involved in the formulation for restructuring the PhD programs at SCI school.
- We are involved in the FoA (ForskningsämnesAnsvarig) recruitment for applied physics and math by gathering nominations from the PhDs and being involved in the interviews as well.
- With the new PhD program structure, the school wants to renegotiate the time compensation for the council, so we are reformulating and negotiating the time compensation with the school
- To be proactive, we are exploring ways to improve the awareness of channels in situations of harassment of any form
- We have noticed that the disparity in gender ratios in the school needs to be addressed, so we are exploring ways to improve the gender ratio in the programs.
